This is a media release - distributed by AAP MediaNet.

Update on Select Tissues Sustainable Sourcing Woolworths has today announced that it has concluded its contract commitments for the supply of Select paper product.

Woolworths has conducted an extensive and diligent review of its supply arrangements including an investigation of the credibility of all appropriate forestry certification standards and processes. As stated by the ACCC in its inquiry, this is an extremely complex area.

As a consequence, Woolworths will take this opportunity to develop a new specification for Select paper products incorporating globally recognised sustainability credentials.

Once developed, both local and international suppliers will be invited to tender for the contract.

Remaining stock will be sold through our stores.
